PROFILE

Full-Stack Software Engineer focused on building scalable and impactful solutions. Committed to delivering secure, user-centered applications that empower organizations and drive meaningful digital transformation.

WORK EXPERIENCE

Zamboanga City Medical Center
Full Stack Developer | Lead Developer

2022 – 2025

- Led the development of UMIS, a unified User Management and Human Resource Information System, serving as the central authentication and user control platform for all integrated systems.
- Delivered a Full-Stack Telemedicine Platform with patient referrals, real-time consultations, WebRTC video calls, and socket-based messaging.
- Delivered a Full-Stack Patient Referral Platform connecting regional hospitals for secure patient transfers to a tertiary facility.
- Developed React (TypeScript) and Laravel API templates integrated with UMIS authentication to streamline new project development for the team.

Freelance Full Stack Developer
Lead Developer

2022 - 2022

- Delivered a PR-to-PO System for a local business, automating purchase requests and orders based on sales, stock levels, and monthly trends (e.g., dengue season).

INTERESTS

Coding, Anime, Photography, Outdoor Exploration.
